

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

some of us have an auditory processing disorder, which means that although we heard the person, our processing deficits kept us from immediately understanding what was said.

India is the second largest producer of wheat and rice. the world's major food staples.

Want In general most farmers want to make a profit, enjoy self employment, land regulation, good weather, bumper crops, health, wellbeing, access to competent labor and this list could go on and on

Needs raising agricultural productivity per unit of land will need to be the main engine of agricultural growth as virtually all cultivable land is farmed. water resource are also limited and water for irrigation must content with increasing industrial and urban needs.

India is currently the world's second largest producer of several dry fruits , agriculture based textile raw materials, eggs, coconut, sugarcane etc...

Dream I want india to be technologically advanced, agriculturally advanced as well as scientifically better. every barren land in the country, which has not witnessed crop in ages, would be cultivated for achieving food grains. i am proud of my country, where agriculture is te backbone and pushes the GDP ahead.

Indian's Agricultural Crop Production Analysis (1997-2021)

These factors are grouped in three basic categories known as technological (agricultural practices ,managerial decision etc...)

Biological (diseases, insects, pests, weeds) and Environment (climatic condition, soil fertility, topography, water quality.

Personal and emotional factors- personality, beliefs, expectations, emotions, mental health.

Physical factors- age, health, illness, pain, influence of a substance or medication.

Life experiences- family, culture, friends, life events.

Anxiety is often connected with overstimulation from stressful environment or threat.

India's arable land area of 159.7 million hectares (394.6 million acres) is the second largest in the world, after the united states.

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
